ORANGEMEN PLAN JOYOUS TWELFTH

NEWS ITEMS FROM KINSELLA

The next big event in the community will be the Orange Celebration on July 12th, under the auspices of Alexander County L.O.L.

The program for the day includes a parade that starts from the lodge room at 11 A.M. after which there will be speeches by prominent Orange men.

There will be a program of sports such as baseball, first prize \$50.00, second prize \$25.00.

Tug of War between Lodge Teams ten a side, for a purse of \$10.00.

Bicycle race for boys under ten years; the same for girls.

Running races for men, women and children, high jump, hurdle races, hop step and jump, and many other athletic events.

Meals will be provided by the Irma Ladies Aid on the grounds; refreshment booths, etc., to cater to the needs of all.

Admission, adults 50c, school children 25c, under school age free.

7 BADLY INJURED ON C.N.R.

Two Other Edmontonians Among the Victims—Scene Was Unity, Saskatchewan

Unity, Sask., June 28.—Piling huge freight cars 50 feet in the air, killing Charles Bradshaw of Edmonton outright, and believed to have snuffed out the lives of at least three other men, in addition to sending seven others to hospital, and causing damage amounting to several hundred thousand dollars, one of the most spectacular train wrecks in the history of the Canadian National Railways occurred at Yonker, about thirty miles west of this point early on Wednesday evening.

Thirty-five cars of a 75-car train left the rails, splintering into piles of twisted timberwood, and piling costily freight into the ditch. As the "Big Mike" 3500 class engine endeavored to slide to a stop when the engineer sensed the accident, the cars behind piled into the engine, weighing with road equipment 225 tons, and the cars piled up one on top of the other until they toppled into the ditch, leaving a mass of wreckage 50 feet high.

The dead man and several companions were riding the freight into Saskatchewan to secure employment, and it is feared that several others who were also "riding the rods" have been killed under the tons of debris which litter the scene.

A "sun-kink" is believed to have caused the heavy train to leave the rails. Railroadmen state that the "sun kink" is caused by expansion of the rails in heat, the steel warping and sliding out from under the cars as soon as it receives any pressure.

The injured men are William Hickiey, Edmonton, fractured thigh and femur; Chris Larsen, Edmonton injuries to ankle and foot; Mike Luka Prakap, Winnipeg, fractured skull; John Kold Cranbrook, back injuries; Alf Peterson, Winnipeg, cuts on eye and head, and another unidentified man who is still unconscious.

AVONDALE U.F.W.A.

HEAR MRS. PICKLES

Over 50 gathered at Mrs. Walter Gray's on June 23rd to attend the U.F.A. meeting and to hear our director's (Mrs. Mae Pickles) address. The guests were inspired very much by the messages she gave and are very anxious for her to visit us again during the summer. Mrs. Pickle was very much impressed with the meeting in general and evidently she is not one to scatter flowers, when they cannot be appreciated, so she told us about it there and then. Mrs. Pickle has a very pleasing personality and her address was splendid. Other locals anticipating her coming have indeed something to look forward to.

Paxton, Paschendale and Avondale schools are holding a joint picnic on Thursday evening in honor of Misses Watson, Welsh and Bennett, and their pupils. Picnic will be held at Paschendale school.

Miss Bennett is having a little party for the pupils and parents on Friday P. M., June 29th.

The Irma Women's Institute will meet at the home of Mrs. Fischer, on Thursday, July 5th. All ladies are invited.

Miss Hazel Condon has been engaged to teach the Education Point school for the incoming school year.

The Coal Springs Choir paid a visit to Kinsella last Sunday afternoon and gave a splendid concert, the program consisting of Male Quartette, Solos, Anthems, Instrumental Solos, and Duets, also readings from Mrs. Waite and Mrs. Luxton, each one taking their part and doing fine. Much credit is due them for the work they are doing. At the close a Silver collection was taken up for the Junior Red Cross, which amounted to \$27.55. Any who were not present for the concert surely missed a treat.

Mrs. P. J. Wangness is spending a few days in Edmonton as a couple of her music pupil are taking their music examinations. The pupils are the Misses Betty Cooper of Phillips and Georgia Lee of this place.

Mr. and Mrs. Harvey Mackay spent Sunday at Irma.

The Induction Service for Mr. McNeal, the new pastor for Jarro and Kinsella churches, will take place in the Kinsella church on Wednesday evening, July 4th at 8 P.M.

Mrs. Hawkesworth and son, Claude, of Vermilion spent Sunday with her daughter Mrs. Jack Neal, also a cousin of Mr. Neal's was with them.

Do not forget the Ladies Aid Tea, on Saturday afternoon, July 7th in the church, from 2 P.M. until 6 P.M. There will also be a sale of aprons.

Mrs. Scott returned from Edmonton on Saturday where she has been for the past two weeks.

Mr. and Mrs. E. C. Williams and Mrs. Williams, Sr., spent Friday at Wainwright.

Mr. and Mrs. M. Neace and Miss Edith Corbett spent Friday afternoon at Wainwright.

We are sorry to report that Mrs. Arthur Lawdon is in one of the hospitals in Edmonton.

JOINT INSTALLATION OF IRMA AND VIKING A.F. & A.M. OFFICERS AT IRMA

A joint meeting for the installation of the officers of Grattan Lodge No. 144, Irma, and Connaught Lodge No. 69, Viking, was held at Irma on Monday evening. The Most Wor. Bro. the Grand Master A. M. Mitchell, of Edmonton conducted the installation ceremonies.

The officers of Grattan Lodge for the ensuing year are:

O. L. Chase, I.P.M.
F. C. Weise, Wor. Master.

L. A. Schom, S. W.
E. A. Tomlinson, J. W.

I. T. Skiles, Treas.
R. M. Campbell, Secretary.

H. W. Love, Tyler.

G. Tripp, I. G.

J. H. Elliott Chap.

P. J. Hardy, S. D.

W. Cole, J. D.

P. Jones, D. of C.

M. L. Wright, Registrar.

J. Rae, S. S.

K. S. Grant, J. S.

The officers of Connaught Lodge are:

L. R. Coles, I. P. M.
C. G. Purvis, W. M.
G. M. Little, S. W.

W. H. Einney, J. W.
W. H. Anderson, S. D.

C. B. Bassall, J. D.

Chas. Broughton, S. S.

E. Solstad, J. S.

H. A. Meredith, Secretary.

R. F. Keeley, Treasurer.

J. W. Bainbridge, Chap.

H. Rollans, D. of C.

W. McAtthey, Registrar.

N. C. Graham, I. G.

Wm. Sheets, Tyler.

Two brothers were raised to the third degree with R. W. Bro. McAtthey, as W. M. pro tem.

At the conclusion of the work, a banquet was held at which Preye Jones ably presided, as toastmaster. An eloquent address was given by the Grand Master, and short speeches by several other brethren. Members of Masonic lodges at Hardisty, Wainwright, Jarro, Viking, and Irma were in attendance.

The residents of Strawberry Plains met at the school Wednesday evening and gave a farewell party to Miss E. H. Leppard, teacher who is leaving the district. During her stay on the plains, Miss Leppard had made a host of friends who are sorry to see her leave the district. The parents presented her with a hat box while each pupil gave an appropriate remembrance to their former teacher.

The residents of Strawberry Plains met at the school Wednesday evening and gave a farewell party to Miss E. H. Leppard, teacher who is leaving the district. During her stay on the plains, Miss Leppard had made a host of friends who are sorry to see her leave the district. Wedding Bells

PRIOR - HAMILTON

A quiet wedding was held in Wainwright, Tuesday, June 26th, when Rev. Mr. Pybus united in marriage Erle Prior, son of Mr. and Mrs. W. H. Prior and Miss Elizabeth Hamilton, daughter of Mrs. John McCready, Mr. and Mrs. Murray Hamilton, brother of and sister-in-law of the bride were in attendance and after the ceremony the happy group motored to the groom's home where a wedding supper was served. The happy couple intends making their home in the Ordinance district where they have a host of friends with whom to join in wishing them a long and prosperous journey through life.

The induction of the new minister at Wainwright United Church, the Rev. Norman Whitmore will be held in the church at Wainwright next Tuesday even'g, July 3rd. Rev. R. H. McPherson of Holden will preside and Rev. M. L. Wright will address the minister, and Rev. J. Woolatt of Edmonton will address the congregation.

The Ladies Aid of the United Church are soliciting donations of food and helpers for their big dinner on July 12th when they will provide eats for the Orange celebration upon the anniversary of the Battle of Boynes.

"Safety First" on the Highways

The phenomenal growth in the number of motor driven vehicles on the highways of this continent constitutes one of the most amazing developments of modern times. The motor car has, in fact, completely revolutionized modes of living in the space of a very few years, and, equally so, has ushered in an entirely new era in the history of transportation.

It is not necessary to even enumerate the many changes which the general use of the motor car has brought about. These changes are patent to everyone. The result has been, of course, to likewise create entirely new problems which did not confront, and were never dreamed of, by the people of a century of generations ago.

The motor car has forced governments and municipalities to completely re-organize plans and the work of road building because what was regarded as an excellent road for horse drawn buggies and wagons is quite obsolete in these days of motor traffic. The result has been to compel huge expenditures upon all governmental authorities, not only in the construction of a much higher standard of road, but in annual maintenance charges in order that such roads shall be kept up to that high standard, and shall be available for use at all times in all weathers.

In large cities, the multiplicity of cars has created congestion and traffic problems of the most difficult kind, and the number, power and speed of modern cars not only an hourly danger to each other and their occupants but to all pedestrians. Laws governing rates of speed, laws prohibitive of glaring headlights for night driving, and innumerable rules of the road in an effort to regulate this enormous and ever increasing traffic, have been passed. Many of these enactments were experimental and found ineffective. Amendments to laws have followed amendments in rapid succession, yet the toll of accidents and violent death mounts steadily higher and higher.

The fact might as well be faced—it must be faced—that only through the practice of the principle of "Safety First" by the people themselves—all the people—can the civilization of today really control this modern juggernaut which the inventive genius of this generation has brought into being and to such a high state of power and efficiency.

Legislative enactments, and arrests and fines for violation of those laws, will not, and can not meet, the existing problems. Public sentiment and the public conscience must be aroused against those who habitually and wilfully disregard the laws and regulations passed in the interests of all people. The speed maniac, the man who persists in flashing blinding headlights in the eyes of all other car drivers, the crank who considers it an insult and a reflection upon himself and his car to allow any other car to pass him on the road, the crazy fool who not only disregards all safety precautions for himself but who is callously indifferent to the fate of others, and the common "roadhog" who ignores everybody's rights and selfishly arrogates whatever he desires to himself; all these enemies to the welfare, enjoyment, rights, and even lives of others, must become taboo throughout the land and be ostracized by his fellow citizens in the community.

Every driver of a car should keep constantly in mind that it is a powerful machine, he has in his control, and that the safe way is the same way. Common sense will prevent accidents. Apply it. There is not only the law but an etiquette of the road. Observe it. Protect person and property—your own and the other fellow's.

Two controllable factors enter into accident prevention on the streets and highways—your car—yourself. Always observe, among others, the following simple rules for safety:

1. Keep your eye right; see that the brakes, steering gear and headlights are in perfect working order.
2. Keep your eye on the road and your hands on the wheel.
3. In passing traffic, look ahead.
4. If a "road-hog" tries to pass you—let him.
5. Entering main streets and highways—stop and listen.
6. Don't rush through nor "load" in heavy traffic.
7. Signal before you slow down, stop, or change your course.
8. Look before you back up.
9. Obey the "Stop" signal.
10. Watch your "Step"—Don't "step" on the gas, the train will win.

Continues Best Seller

Norse Celebration In Winnipeg

Great Interest Being Taken In Re Union To Be Held Shortly

The Bible continued to be the world's best selling book in 1927, establishing a new record of 10,034,797 copies says the annual report of the American Bible Society.

Copies were published last year in 166 different languages and dialects, and the first complete Bible in the Luba Lubu language of the 2,500,000 Bantu natives of the Belgian Congo was issued by the Society.

There are 150 convicts serving life terms in prisons of Canada.

GOOD ADVICE FROM MOTHER OF SEVEN

Recommends Lydia E. Pinkham's Vegetable Compound

Toronto, Ont.—"I began taking Vegetable Compound for nerves and other troubles and I must say I feel different after taking it first. I have been told this last six months that I am about twenty-five, although I am nearly forty-seven, and have had seven children. I have taken Vegetable Compound regularly for some time and sleep well, rise early and feel young."—Mrs. MCKEE, 18 Laurier Ave., Toronto, Ontario.

"Hi, there," bellowed a policeman to an inebriated citizen, "you can't stand there in the street."

"Yes, I can orfsher" retorted the citizen proudly. "Don't you worry 'bout me. I been standin' here an hour an ain't fell off yet."

Young Bride: "I want a piece of meat without any gristle, bone or fat."

Butcher: "Lady, you don't want any meat—you want an egg!"

The Standard of Quality Since 1853

University Of Alberta

New Laboratory and Greenhouse To Be Erected This Year

Increased accommodation is being provided this year in the department of field crops at the University of Alberta by the erection of a new laboratory and greenhouse for the study of plant pathology and plant breeding. This additional space will make possible the carrying out of a co-operative attack by the university, the federal department of agriculture, and the national research council on the problem of root rot diseases.

Jr. A. H. Henry, formerly of the University of Minnesota, on his return from Europe last fall, joined the staff of the department of field crops and will lead the plant pathological work at the university. Dr. G. B. Sanford, the federal division of botany, will have charge of the Dominion laboratory of plant pathology, and Dr. O. S. Aasbodi, of the University of Minnesota, has been appointed to take charge of the work in entomology. Dr. Aasbodi will spend the summer in Europe, mainly at Cambridge and St. Louis, and will take up his work at the university in the fall. Professor J. R. Fisher will continue in charge of forage crop breeding. Disease resistance is one of the main qualities being sought in the plant breeding work.

Newest Town In Northland

Cranberry Portage, Manitoba, Important Point On Flin Flon Railway

Cranberry Portage, which sprang into being almost overnight, is the North Country's newest town, and citizens believe it is destined to be one of the most important points on the Flin Flon Railway.

A month ago there was nothing there except railway construction offices and warehouses. Today it has a population of 100, with two hotels and a number of other thriving business establishments. A board of trade is being organized and soon there will be a mayor and regular municipal organization.

Within a mile of the town work is going forward on a number of mining claims.

Trained Fire Fighters

For British Columbia

Experts Will Combat Fire Menace In Salmon Arm Section

When the fire menace again sweeps through the forests of the Salmon Arm section of British Columbia this summer, it will be combated by men trained for just that emergency. The fire-fighting will be done by experts and not by novices.

The reason for that is that the men who will be employed in fire-fighting this season have literally gone to school again and have studied the most approved methods of reducing the hazard and beating the flames when they once get under way. Special subjects were taken up each day and included the study and demonstration of approved methods of disposal of slashings.

Ship Muskrat To Europe

What is believed to be a record for muskrat shipments from Canada has left on board the Canadian Pacific vessel "Beaverdale" bound for Antwerp. It consists of 149 muskrats, the foundation stock for muskrat ranches in Germany, Finland and France. The consignment was made up of 74 pairs and operated at a muskrat farm at Lindsay, Ontario.

For Burns and Scalds.—Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be at home every household so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

A going clock is one that has been wound up, a going concern is one that hasn't been.

For Hay Fever—use Minard's

Victim Of His Invention

Radium Paint Inventor Is Slowly Dying Of Polson

The New York Times says that Dr. S. A. Von Soschokoff, inventor of the radium paint which is said to have doomed five New Jersey women to a slow death, is a victim of his own invention. The paper says that although the doctor was reticent to talk about himself, marks of the invention of radium were plainly evident. His front teeth are gone and his fingers are up to the second knuckle, black, the result of radium necrosis.

The doctor has frequently risked his life in recent years to treat friends with radium.

Dr. Von Soschokoff brought to this country with him several years ago the formula for the radium paint. He became an official of the U.S. Radium Corporation in whose plant the five New Jersey women are said to have acquired the radium poison.

They recently made a settlement with the company for \$10,000 each, a life-time annuity of \$600 each and insurance for their relatives when they die.

Recipes For This Week

(By Betty Barclay)

ECONOMICAL PUDDING

1 quart water
1 teaspoon salt
1 cup pearl tapioca
1 teaspoon vanilla
4 tablespoons butter
1 1/4 cups brown sugar

Cook tapioca in water until transparent. Add other ingredients. Bake one-half hour.

LEMON DROP COOKIES

1-3 cup butter
1/2 cup sugar
1 egg
1/4 teaspoon soda
2 tablespoons hot water
1/2 tablespoons lemon juice
Grated rind 1 lemon
1/2 cup flour

Cream butter; add sugar, gradually, and egg, beaten until thick and light, soda, dissolved in hot water, lemon juice, grated lemon rind, and flour. Mix well, drop from tip of spoon onto buttered baking sheet, and bake in quick oven.

To make crisp cookies, use one and one-half cups flour when mixing; chill thoroughly, roll very thin, sprinkle lightly with sugar, cut out, and bake.

20,000 passengers have been carried by one commercial airplane company, without a single accident.

Much of the experience a man gets comes too late to benefit him.

Millions of Acres of Farm Land In the Western Provinces Still Available For Settlement

Information furnished by the department of the interior provides some interesting light on the extent of farmland now available for settlement in Canada.

The bulk of farm lands available, of course, is in the western provinces. In Manitoba, Saskatchewan, and Alberta, there is altogether a total of 203,639,144 acres of land in the surveyed area. Of this amount Alberta has 87,889,701 acres, Saskatchewan, 78,613,310 acres, and Manitoba, 37,136,133.

It is rather surprising to note that of the total acreage in the surveyed area of the three prairie provinces, there remains but 23,167,000 undivided, or, available for homestead.

In addition to the area of surveyed lands undisposed of there is available for settlement some 73,000,000 acres held by other interests. The Hudson's Bay Company holds 7,028,500 acres, the railways have 31,732,655, for school land endowment purposes there is a reserve of 9,342,700 acres, and now under grazing lease there are 25,799,600 acres, practically all of which represents farm lands.

Of the above total, aggregating 66,000,000 acres, a large proportion is at present rather remote from rail-way and transportation facilities, and much of it is in the dry belt or otherwise not suitable for immediate farming operations. The exact extent of the land suitable for farming purposes is not known although the topographical survey branch of the department of the interior has done a good deal of work in the direction of soil survey in recent years and has plans made for continuing the growth over the next few years.

There is another factor contributing to the area of lands available in the three prairie provinces, of which Manitoba has 2,400,000 acres, Saskatchewan, 7,500,000, and Alberta, 8,500,000.

In British Columbia it is estimated there is a total of approximately 18,400,000 acres of such land available as well, that is the land held by private owners for purely speculative purposes. It is estimated that for farm settlement in the western provinces and in the old provinces that there are in the neighborhood of 4,500,000 acres of good farm land available for settlement along what is known as the railway belt and in the Peace River District.

There is therefore approximately 119,067,000 acres of land available for farm settlement in Canada west of Ontario.

Students To Tour Dominions

British Students Will Pay Visit To Africa and To Canada

On a tour through the Empire, a party of five university and former public school students, have sailed from England for South Africa. Later, they will visit Canada. The tour was arranged by Hon. Col. L. C. M. Amerly, secretary for the Dominion, with a view to giving the young men an opportunity of visiting the principal Dominions before embarking on their careers.

A party of young women students will visit Canada in July.

Just a Suggestion

The tax notice indicates that farm players play some small part in paying for the highways. Would it not be fair enough to tack another cent on the gasoline tax and use the extra revenue in providing footpaths along these speedways for school children and other pedestrians?

It is a fine thing to possess knowledge and to apply it. But if you lack it then it is a fine thing to know that you lack it. That's wisdom.

A Scotchman was asked what he would do if someone left him a thousand pounds, and he replied: "Count it."

"But, Dick, if your wife knew?"
"She would tear my hair."
"Don't flatter yourself." — *Der Brummer, Berlin.*

Want Higher Education

Young People On Canadian Farms Take University Vacation Course

In addition to the 42,540 registered students in the 23 universities of Canada it is estimated that close to 20,000 young people took extension, vacation, or short courses offered to farmers and farm boys and girls in 1927. These courses embrace a wide variety of subjects, from instruction in the mysteries of gas engines to the art of first aid and home nursing. A recent report of the Canadian Government Bureau of Statistics shows that 11,254 male students took the farmers' course in the University of Saskatchewan. 5,500 young women took the homemaker's course, and 2,751 were enrolled in the boys' stock judging classes in the same university.

To Overcome Goitre

New Discovery Is Outlined At Meeting Held In Toronto

The discovery of a chemical compound which will compensate for deficiencies in the thyroid gland—which gland not only controls the growth of individuals but is responsible for that insidious growth, goitre—was outlined by Prof. George Barger, F.R.S., at a meeting of the Canadian Chemical Association at Toronto.

One of the principal elements in thyroxin is iodine, and it was found in the United States. He demonstrated with a map, that the less iodine in the water supply of a district the greater was the growth of goitre.

A Charming Frock For The Larger Woman

The attractive novelty silk crepe model pictured here is one of the season's smartest frocks. The long collar and front panel are of contrasting material and give the much desired slimlining effect. There is a shirred inset at each side of the front, tucks at the shoulders, and long sleeves gathered into wristbands. Sizes 36, 38, 40, 42, 44, 46, 48 and 50 inches bust. Size 38 requires 3½ yards 36-inches or 2½ yards 44-inch material. Price 25 cents the pattern.

Hence sewing brings nice clothes within the reach of all, and to follow the mode is delightful while it can be done easily and conveniently by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make without difficulty an attractive dress. Price of the book 10 cents the copy.

Predicts Food From Wood

If Not Very Palatable Would Be Nourishing Says German Chemist

Extracts from wood may soon replace the juicy beefsteak and the various concoctions made from the flours of several grains, according to Friedrich Bergius, the chemical engineer, whose process for liquefying coal to obtain gasoline is well known.

Lecturing before the Association of German chemists, meeting at Dresden, Herr Bergius explained that in the future the table would not be decorated with slabs of trees on which diners would gnaw, but that the wood would first be converted to coal under very high pressure in the presence of steam. Six tons of pressure per cubic centimeter would be necessary to do this, he calculated.

From his product, Herr Bergius means to extract edible substances which, if not so palatable, as a French chef would desire, would nevertheless be nourishing. Even if the products were only suitable for feeding cattle, hogs, and other animals raised for food, he declared that the process would still enable production in Germany to be increased to a point where importance would be unnecessary.

To Call Ourselves Canadians

National Council Of Women Sees Desirability Of Building Up Strong Canadian Citizenship

The Granting Of Credit

Banking Facilities Available To Farmers Have Greatly Improved

Credit used to be extended for the most part only to governments and rulers and potentates. With the growth of commerce came commercial borrowing. But the granting of banking credit to individuals not engaged in commerce only recently became an important factor in this country.

To buy on the installment plan meant the granting of credit on a scale never before known. This credit was extended by the seller, but the installment seller usually turned to some financial institution to share the burden.

Meanwhile machinery has been organized in most parts of the country to enable farmers to borrow on reasonable terms. The banking facilities available for our farm folk today are incomparably better than they were even a few years ago.

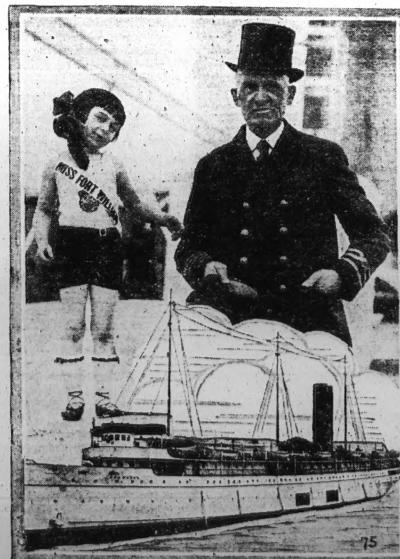

Both movements represent the democratization of credit.

Western Cedar, Only In B.C.

The range of the Western cedar in Canada is confined to the province of British Columbia. More shingles are made from the Western cedar than from any other species. Over 2,500,000,000 were cut in Canada from this tree in 1926. In addition over 130,000,000 board feet of lumber, 30,000,000 laths, and an immense number of poles and posts were produced from it in the same year.

From Small Towns

It is discovered that 80 per cent of the men whose names appear in a list of prominent citizens in Chicago were born in small towns. The same will be found true in almost every large city. There is greater likelihood of the development of individuality in small towns. People born and spending their early years in large cities seem to grow up to be more alike—more of a certain type—than folks who grow up in little places. In the big cities corners get knocked off and we tend to become like marbles in a bag.

Two High Hatted

Captain McPhee is very high hat. The "Beaver" was presented to him by Miss Fort William on behalf of the harbour officials upon the arrival of the Canadian Pacific S.S. Keewatin, the first steamship to reach the head of the lake this season.

Incidentally, this vessel opened the port of Sault Ste. Marie, where the skipper received his first topper. Captain McPhee thinks that the hats may be handy when he receives Kings and potentates aboard the Keewatin this summer, but he will stick to uniform on the bridge.

The Effect of Sun Spots

On Living Conditions Is the Subject of Scientific Investigation

The Sun is usually looked upon as a permanent body radiating steadily a life-giving stream of energy. True, he comes and goes with day and night, and rises and declines in the heavens with the changing seasons, but these apparent defections are ascribable to the vagaries of the earth. However, on many occasions during the past twenty centuries, keen eyes have detected and recorded the presence of dark spots on the Sun, at times when he was sufficiently dimmed by smoke or haze to be closely observed. These spots march across the surface of the Sun indicating a period of rotation of about twenty-six days. They wax and wane in size and numbers in an irregular period with an average length of about eleven and a half years. The telescope and spectroscope reveal the fact that the dark spots are accompanied by brilliant clouds especially rich in the light of glowing hydrogen and of calcium, the ultra-violet light of the latter constituting a relatively large proportion of all the ultra-violet light of the Sun.

Ultra-violet light has the power of disrupting gases at low pressure and liberating electrons. Hence it is not surprising that the northern lights and magnetic effects on the earth have been found to pulsate with the spottedness of the Sun.

It has been observed also that the polar caps of the planet Mars melt more rapidly when spots are plentiful on the Sun than when they are few in number; and that Encke's comet is at its return every three and a half years brighter at or near the times of sun-spot maximum than at minimum; and also that certain errors in the predicted positions of the Moon and planets coincide with a longer period in solar spotlessness of sixty or seventy years. Consequently, it has not been without reason that a great number of investigations have been made in the search for a relationship between the variations in the Sun and in the weather and in living things. This is one of the objects of research at the Dominion Observatory, Department of the Interior, Ottawa.

In such a search effort has naturally been mainly confined to those records, unfortunately too few in number, which cover long periods of time. Scanty as they are they have revealed an eleven-and-a-half-year period existing in various terrestrial phenomena, and in a few cases where records of both living things and the weather were kept, the relationship to sun-spottedness is still more convincing.

In the case of the auroral and electro-magnetic effects, as mentioned above, the relationship is at once apparent; in that of rainfall in some localities the pulsation of eleven-and-a-half years (in the mean) shows a decided correspondence to the solar variations, temperature, barometric pressure, and number of storms have likewise shown the same periodic pulsations. A similar rhythm has been noted in dates of migration-arrivals of birds in France (Chandon records, Montdidier); numbers of rabbits in Canada (records of Hudson's Bay Company); marriages, births, and deaths in Russia (for the longer period of seventy years); influenza, growth rates of cotton and of corn in some localities in the United States. But perhaps the most valuable of all records are those obtained from the varying thickness of the annual rings in the giant redwoods of California during their three thousand years of growth. The measurements of these rings correspond so conclusively with the European records of sun-spots of the last three hundred years, that they may be regarded as yielding information concerning the solar variations during the centuries for which we have only the fragmentary Chinese records of sun-spots. The existence of the eleven-and-a-half-year sun-spot cycle and its reflection in terrestrial conditions, probably many thousand years ago, appears likely from the testimony of a Sitzia spruce recently released by the recession of a glacier in northern British Columbia and measured at the Dominion Observatory.

We may confidently look forward to the time when accumulating knowledge on sun-spots and other solar effects will provide a basis for valuable predictions concerning the weather and living and economic conditions. At the present time, however, notwithstanding statements which have appeared in the press, our knowledge is too incomplete to make definite predictions. The realization of our dependence, and that of all the forms of life within our ken, upon the Sun is inducing astronomers, scientists, and statisticians, the world over, to bend their efforts to a

Start Range Experiment

Dominion Department Of Agriculture Open Station Near Manyberries, Alberta

A Dominion Range Experiment Station comprising about 15,000 acres has been started under the direction of the Dominion Department of Agriculture Experimental Farms Branch. The station is located in the vicinity of Manyberries, Alberta, about 45 miles south of Medicine Hat.

The opening of this station marks the commencing of a new phase of agricultural research which is under the direction of the Forage Plant and Field Husbandry Divisions of the Experimental Farms.

The object of the research work is to attempt to solve many of the problems confronting the rancher, who finds the ranges are not capable of carrying the same number of stock as formally. Forty-two projects will be started as quickly as circumstances permit.

The economic value of such work will not be immediately apparent, but ways and means are ascertained of improving the quality of the range pastures, more animals will be able to be carried to the acre, and the output of meat, hides and wool will be improved.

The United States is engaged in similar work, while the Imperial Economic Committee of the Empire Marketing Board is using some of the funds devoted to Scientific Research to pasture investigations at the Rowett Institute, Aberdeen. The research is also being conducted in the highlands of Kenya, in New Zealand, and in Australia. The Imperial Economic Committee estimates that the grass lands of the Empire support 200,000,000 head of cattle, and 200,000,000 sheep.

Destroyed Poison Gas

Phosgene Stored At Hamburg Was Shot Into Sea

The remaining supply of poisonous phosgene gas stored in the Stoiberg chemical factory at Hamburg was destroyed by throwing it into the sea. The Reichswehr being entrusted with this job. The method of destroying the gas by neutralizing it with a solution of caustic soda was pronounced too slow and not adequately safe.

A company of soldiers removed the large gas containers to a ship, where the liquid phosgene was transferred to the air chambers of old torpedoes, each of which held seventy-five gallons. The gas-filled torpedoes were then shot into the sea. This work required two or three days to complete.

No more deaths have been added to the eleven caused by part of this gas escaping into South Hamburg.

Demand Exceeds Supply

Government Poultry Plant at Oliver, Alta., Doing Large Business

Over ten thousand chicks have been distributed during the past spring from the Provincial Government's poultry plant at Oliver, Alta. Officials in charge of the plant report that the demand has been greatly in excess of the supply and that many applicants have been referred to other breeders and hatcheries for their requirements. The breeds represented in the shipments include White Leghorns, Barred Rock, and White Wyandottes. Over three thousand chicks and chicks are being reared on the farm this summer. In view of their increasing economic importance, a beginning is being made this year with turkeys.

No man can make a mountain, but the majority can make a big bluff.

CROPS ARE LOOKING FINE

Early seeded wheat is now in the shot blade in many sections of the province and all grains are making rapid and vigorous growth, according to the telegraphic reports received on Friday by the Department of Agriculture, for the fourth fortnightly crop report of the season. The entire province has benefited by the rains which have been general during the past two weeks, and the setback which crops in some areas received as a result of delayed germination is rapidly being recovered although some fields are somewhat patchy. Warm growing weather is now the most urgent requirement for crops to take full advantage of the abundant supply of moisture.

Never in the history of the province has a crop been sown under better conditions as far as high quality of seed and treatment for disease are concerned, and never has more concerted action been taken to keep fields free from noxious weeds.

Conditions are reported generally to be ideal for breaking and summerfallowing, and the opinion is expressed that the acreage of new land brought under cultivation this season will again be of record proportions.

Some seven thousand acres have been seeded to sugar beets in the southern part of the province, and of this acreage fully one third is reported to be showing a perfect stand, with the remainder giving promise of a good average crop.

Cutting of alfalfa and sweet clover has commenced in the south but has been interrupted to some extent by the rains. Very local hail damage is reported in one or two districts, but crops in the affected area are making a good recovery. Practically no insect injury to crops has occurred with the exception of the appearance of wire worms in some northern districts.

Crops in the Peace River country are well advanced and in view of the increased acreage under crop this year in the north, conditions generally are considered promising for heavy grain shipments next fall and winter.

Edmonton Fair

Visitors at the Edmonton Exhibition, which is being held July 16 to 21 next, will find that extensive alterations and improvements have been made to the grounds and buildings. Five new cattle judging rings will be located immediately to the west of the cattle barns, and accommodation will be provided for spectators.

In the Women's Building new glass show-cases have been installed which will give a greater display to the various classes of women's exhibits. The art section has been moved to the old Administration Building leaving the entire upper floor for women's needlework and cooking.

The Prize List will be "bigger and better than ever." An entirely new prize will be that given for decorated stalls, \$5 for the best decorated stall in each breed of horses and cattle, and \$10 for the best decorated stall in any breed of live stock. Cattle breeders will be especially interested in the new classes which have been added in each breed for Alberta-owned cattle. In the Sheep and Swine sections a graded scale of paying prizes has been adopted which will magnify the number of awards in accordance with the exhibits shown and make the whole more comprehensive and far-reaching in its scope. Large increases have been made in the money offered for honey, and the classification has been made broader.

Grains also will receive increased awards and a new system for displaying threshed grains will be used. As a special award the Alberta Pacific Grain Company has offered a silver cup for annual competition and a small replica of it will go to the winner each year for permanent possession.

Another new feature will be classes for farm women, including prizes for the best patchwork or pie-work quilt, and the best pair of handknit socks or stockings. This is expected to prove particularly attractive to women in rural communities.

Arising out of the first special conducted farmers marketing tour of Great Britain and Denmark, taken last winter, there will be a new exhibit by the Dominion Government, in association with the Canadian National Railways. Other items of interest will be the Old Timer's and Forestry Cabin.

A feature which will be a boon to parents is the Free Baby Clinic, operated under the direct supervision of the Provincial Department of Health. Entries for all departments close July 3rd and those wanting free Prize Lists should write to E. L. Holmes, Secretary, Edmonton Exhibition Association, Areng Building.

PREPARATIONS FOR VIKING SPORTS

(From The Viking News)

Preparations for the big Dominion Day Sports to be held at Viking on Monday, July 2nd, under the auspices of the Viking and Birch Lake District Agricultural Society are well under way, and indications are that the day will be as big and in many ways bigger and better than previous affairs of this kind which have been so successful in past years.

At a meeting of representatives of the different committees last Thursday evening the final plans were drawn up, and the result is that a full day's program has been outlined that should suffice to please each and everyone that attends.

Baseball Tournament

Camrose, Killam, Innisfree and Viking will clash in a baseball tournament for which a purse of \$150.00 has been hung up and to be divided in generous proportions.

Football!! Games

Football will be featured by games between Phillips, Rutherford and Viking, the winners of the tournament to take the prize of \$25.00. These teams are strong and are playing a good game."

Horse!! Games

The race track is being put in good shape for a harness race trot or pace, pony race 142 hands and under, and a free for all run. Entries are already being received for these races which should prove a drawing card.

Basketball

Men and ladies basketball will be featured. The men's games will be played by teams from Birch Lake, Holden and Viking, while ladies teams will be represented by Phillips Holden and Viking.

Elks Midway Attractions

Some popular attractions will be entertaining and besides this the Elks are distributing tickets to all children entering the grounds that will give them a treat at the refreshment booths.

Elks Band in Attendance

The Viking Elks band will be on hand with a repertoire of selections, both old and new favorites. This band is coming along nicely under the leadership of J. L. Clinton.

Movies 7 to 9 P.M.

Arrangements have been made with Mr. Wood to run off a good picture during the hours of 7 to 9 P.M. at Jensen's Hall.

Dance at Night

After 9 P.M. the Viking orchestra will furnish music for a dance at Jensen's hall and should prove one of the popular attractions of the day's events.

Refreshment booths and lunch counters will be serving the crowds on the grounds so all your needs will be catered to.

NOXIOUS WEEDS

Anyone who has made even a passing study of the subject realizes that the control of noxious weeds is one of the most serious problem facing the Province of Alberta today. To say there is no menace from weeds to say that everything is being done that can be done, would be misleading and far from the truth. We have always had weeds and possibly always will have them. But the damages they do is to a great extent controllable and by a united effort on the part of Federal and Provincial governments, Municipalities and individuals there is no doubt but that the situation can be met and the loss reduced to a minimum. The attitude of many towards supervision and inspection leaves much to be desired. It is human nature to resent criticism and the pointing out of faults. Let us all rise above this feeling and try to see in the weed inspector a friend who may point out faults, but who is willing to advise on the best way to correct them. Do not wait for the Inspector to find noxious weeds, but let us be our own inspectors. Who is in a better position to detect weeds than the man who, in the course of field operations, crosses and recrosses every foot of his land several times each year.

— A. Burnham, Weed Inspector, M. D. of 455.

BRINGS SUIT AGAINST WAINWRIGHT OIL WELLS

An injunction restraining defendants from assigning or otherwise disposing of specified oil leases or in the alternative payment of royalties of one eighth per cent on production is claimed in a suit filed in the supreme court on Monday by the Wainwright Oil and Development Company, Ltd., against the Interior Oils Ltd., Wainwright, Ltd.; Mazda Oil Co., Ltd.; Wainwright Oil Producers Syndicate; Elijah H. Smith, Thomas L. Rawl, John C. Kyle, Thomas S. Keatley and Leslie J. Rumford.

BRUCE NEWS

THIS SPEAKS FOR ITSELF
Bruce, June 22nd, 1928

G. A. Barker, Esq.,
Bruce, Alta.
Dear Mr. Barker:

I was discharged from Viking Municipal Hospital, Tuesday, June 19th, having had my appendix removed on May 29th.

I went to hospital with a ruptured and gangrenous appendix, was operated on by Drs. Little and Hotson, and I know that had it not been for the excellent care I received from the doctors and nurses of the hospital, I should not have recovered.

While I was confined to bed, my little boy, three and one half years old, was operated upon for hernia, by Drs. Little and Saunders, and is making a satisfactory recovery.

I should like my neighbors to know how completely satisfied I am with our hospital and its management.

Yours truly,

Leonard Willans,
The Bruce Sports and Stampede will be held Thursday, July 26th. There will be special platform attractions along with a full line of Stampede events this year. The Vegreville Band will be present.

The writer became the proud possessor of one of the Eclipse pencils by paying up his subscription for the newsy little Viking News. The article is surely a real one, better hurry and get in on this as it is the last week.

Tractor farming is becoming popular this year, large tracts of newly broken land all over the district is evidence of the fact.

Dr. Richardson, the Viking dentist, was greeted with a full house when he made his regular weekly professional visit last Monday, and some who were unable to wait on him, came to his office in Viking on Tuesday for Dental service.

Viking

Luther Sorensen arrived in Viking on May 18th from Whittier, California making the trip on a motorcycle in seven days. While here he visited with Gilbert, Ole, and Thomas Sorenson of Viking. He is leaving today for the Old Country via Winnipeg, Chicago and New York, which trip he also contemplates making on his motorcycle, that is, as far as New York.

Another brother, Karsten Sorensen, also made the trip from Pomona, California, by car, and will be staying here for a couple of months visiting with his relatives, after which he will leave for Chicago.

The Ladies Auxiliary of the United church held a farewell tea at the home of Mrs. H. M. Hilliker on June 22nd in honor of Mrs. W. D. McDougall on the eve of her departure to Edmonton. Mrs. Purvis gave a splendid little talk in which she praised Mrs. McDougall for the willing worker she has been in the Auxiliary also other similar organizations in the community during her comparative short stay here. Mrs. McDougall made a suitable reply in which she stated she will miss the many warm friends she made in Viking and district. Dainty refreshments were served.

A party of tourists returning from the Peace River country where they had filed on homesteads near St. Johns, stopped over at the W. H. Currie home north of town last week on their way to Govan, Sask. In the party were Messrs. Landstrom, Robt. Gossar, J. C. Smith and five sons of Mr. Gossar all of whom filed on homesteads in the north country.

The annual convention of the Canadian Weekly Newspapers Association will be held at Edmonton on July 4th and 5th, at the conclusion of which two days will be spent at Jasper Park as an outing. Country newspapermen from all over the Dominion are expected to be in attendance.

Mrs. Wm. Taylor entertained at her attractive residence three miles south of town last Thursday afternoon. About eighteen ladies from town were present and enjoyed the afternoon in a very social way. Mrs. Mattison and Mrs. Robinson assisted the hostess in serving dainty refreshments.

The Sedgewick Provincial Constituency Convention of the U.F.A. will be held at Viking this year, the date to be announced later. It is expected that Premier Brownlie will address a public meeting on that occasion.

A local farmer was fined in justice court on Monday for refusing to comply with the regulations of the Noxious Weeds Act as instructed by the weed inspector for Iron Creek Municipal district.

Thos. Gotobed reports his field of Marquis wheat up 27 inches on Monday last, and that the crops in his district are looking exceptionally good. We are pleased to publish items so favorable to our community in general.

R. Sparling, former manager of the Bank of Montreal here, but now in the insurance and brokerage business in Calgary, was a visitor in town over the weekend.

Mrs. Ostburg under the auspices of the W. L. finished a very successful three days sewing course on Friday and went to Kinsella on Saturday where she will give another three-day course.

The public and high school examinations will conclude Friday of this week.

First game was between Layoy and Viking, which was won by Viking. It was a hard fought battle, the score being 8 to 5. The batteries were Layoy, Straboth and Robinson; Viking, Wilkie and Marker.

Second game was between Vegreville and Ryley which was won by Ryley after playing an extra inning. Vegreville was leading all through the game until the seventh when Ryley tied up and nosed out in the extra inning by an over throw to third base by the Vegreville catcher fetching in the winning run. Happy pitch for Ryley, Minckler for Vegreville.

The final game between Viking and Ryley was a close game all the way, with Viking leading till the ninth inning when Ryley tied it up in the ninth and then a bad throw to first let the winning run in, Ryley winning the same way as in the first game.

Batteries in this game was, Viking, Dorwood and Marker; Ryley, Oshlund and Stacy.

The tournament was a success and the town and district are getting considerable baseball at home this summer.

Game of June 24th.

The game on June 24th between Wainwright and Viking resulted in an easy win for Viking. The Buffalo town could not get going at all, the final score being 8 to 1 for Viking. On account of the wet condition of the grounds, the game was rather a slow one.

Born to Mr. and Mrs. T. Yule, at the local hospital, a daughter, on Friday, June 15th.

You can afford 2 cars

HOW many times have you wished for a second car, for your wife, for the children? The family with only one car today is being needlessly inconvenienced. You can afford two cars . . . if your second car is a Used Car. From our stock of really good Used Cars, you can choose one that will cost little, add much to the comfort and pleasure of your family, and save a lot of wear and tear on your present car. . . And, if you haven't a car yet, of course you will be all the more interested in these exceptional values.

Consumption Of Meat In Canada

Figures Go To Prove That Pork Is The Favorite Meat

Pork is the favorite meat of Canadians, according to a recent compilation on the meat and poultry consumption of the people of the Dominion made by the Canadian Government Bureau of Statistics. The daily consumption of meat and poultry in Canada is about 7.15 ounces for every man, woman, and child. This means an annual consumption of 775,150,815 pounds of pork; 654,543,623 pounds of beef; 58,191,717 pounds of mutton and lamb; 62,353,901 pounds fowl and chickens; 14,138,558 pounds turkey; 4,856,890 pounds duck; and 9,663,980 pounds geese. In addition there is an annual per capita consumption of 29.67 dozen eggs, of a total of 282,405,692 dozen eggs. Canada's egg bill alone is valued at over \$113,000,000 annually. The per capita annual purchase of meats is 81.13 pounds of pork; 68.76 pounds of beef; 9.69 pounds of poultry; 6.11 pounds mutton and lamb. This represents half a heavy load, a small hind quarter of beef, two chickens and a loin of lamb for every member of every household in Canada, an expenditure at average prices of the different commodities of \$43.09 per person per year. For the whole of Canada this would amount to approximately \$410,173,710 exclusive of the \$113,000,000 egg bill.

Work Of Fuel Board

The Dominion Fuel Board since its inception has conducted exhaustive studies with a view to making Canada independent in the consumption of fuel, with the result that Pennsylvania anthracite is being displaced by other fuels in Ontario and Quebec to the extent of 1,500,000 tons a year. Another beneficial feature is that a variety of fuels has established competition in the markets of domestic fuel supplies.

It is estimated that 100,000,000 people speak Russian.

STUDEBAKER PLANT AT WALKERVILLE, ONT.

The Walkerville Plant of the Studebaker Corporation of Canada, Ltd., where the Studebaker and Erskine Cars are manufactured, is now a purely Canadian concern, employing Canadian labor, and using Canadian material. Studebaker and Erskine cars are becoming increasingly popular throughout the Dominion.

Studebaker To Build Canadian Automobiles For Canadians

Friendly Divorcee Of Canadian Organization From Studebaker Corporation Of America

With the announcement of a farm reorganization, both administrative and manufacturing policies, the Studebaker Corporation of Canada, Ltd., has assumed a front rank position among the Dominion's largest independent manufacturers. The announcement, which indicates friendly divorce of the Canadian Studebaker Organization from the Studebaker Corporation of America, was issued by A. R. Erskine, president of the Canadian company.

The new Studebaker organization will be directed by D. R. Grossman, formerly sales manager for Studebaker in the Dominion. Mr. Grossman will be vice-president and general manager. He has been associated with Studebaker in Canada for the past six years. Mr. Grossman is well known to the Dominion's automotive leaders.

The attitude behind the reorganization is to be found in our desire to build Canadian Automobiles for Canadians," says the statement. "The Studebaker Corporation of Canada is Canadian. We want more and more of Canada's great supplies of raw materials. Not only will our consumption of these commodities be increased, but new commodities will be added to our purchasing agent's lists."

"We want to build automobiles for Canada and we want Canadians to approve of them. It is felt that the time has come to go ahead and start building here in Canada, increasing the number of cars actually built in Canada. We hope to secure greater efficiency than has been possible in the past which will result in greater automobile values for Canadian purchasers."

"Continuing the precedent already established, the personnel of the Canadian organization will be almost exclusively Canadian. In addition,

New Studebaker Organization

Farmers' Marketing Tour Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued)

It was just a step to Canada House and a reception by the Hon. Peter Larkin, High Commissioner for Canada. We were all impressed by the appearance of Canada's Headquarters in Great Britain, Opened at Tratfagia, Spain. Canada House occupies one of the most commanding sites in London, and does honor to our Dominion. There was no formal speech, just a friendly handshake and a few words for all in the private room of the high commissioner.

Now came the event of the day, the reception at St. James'. It was not without awe that we entered this stately palace of red brick after passing its castellated gateway guarded by sentries wearing the uniform of our husby. This palace which we Canadian farmers were entering had been the home of Charles the First, and is today the seat of the Commonwealth of Princes Councils. We mounted the beautiful stairway to the Entrance Room. A short wait and the Prince was in the Adjutant Chamber ready to meet us.

The door opened and His Royal Highness, not seated but standing at the entrance with a smile of welcome. We were introduced by Mr. Grossman who performed a feat of memory by naming all the members.

The Prince had a handshakes, a smile and a few words of greeting for every member of the party, but his friends and neighbors from Alberta were specially honored. Mr. William Sharpe, who has been playing a part on the Prince's ranch was at once recognized by His Royal Highness, when asked "Mr. Sharpe, have you bought a kid?" The mutual friend T. Brown was getting on, and Mr. P. J. Toohey, of the Peace River, was questioned about Peace River problems and the problems of railroads in the north west of the Pacific Coast. The interest of the Prince in Canada was spontaneous and real, and we were delighted with his evident regard for our great Dominion.

After the reception we were shown through the Armoury, Queen Anne's Drawing Room, the Tapestry Room, the Throne Room, and the Picture Gallery, with the Royal Collection, dominated by the paintings of King Henry the Eighth at one end of the room, and Queen Victoria in the other.

Our next stoppage was at Harrods' great stores where we were entertained by Sir Woodman Burbridge head of this great firm to lunch, afterwards visiting the Provision Shop where we saw the great variety of meat, vegetables, etc. It is earning today, as it has done for years, the greatest asthma specific within the reach of suffering humanity.

Piff: "Was it a bad accident?" Bing: "Well, I was knocked speechless and my wheel was knocked spokeless."

Some women wear gloves most of the time and others have diamond rings.

Friendship and confidence are plants of slow growth.

WILL INVESTIGATE CLAIM

The claim of Madame Tchakowsky, Russian refugee, that she is the Grand Duchess Anastasia, daughter of the late Czar of Russia, is one more under investigation. Grand Duke Andre (No. 1), is sailing to America at the request of Mrs. W. B. Leeds (No. 2), whose guest Mme. Tchakowsky (No. 3) is in an effort to determine her identity. No. 4 is the last photograph of Grand Duchess Anastasia before her reported death at the hands of the Bolsheviks ten years ago.

It is shipped from the 17 factories in Denmark, and it is its proud boast that it has never refused to handle all supplies of gum to it regardless of the condition of the market.

(To Be Continued.)

Canadian Boys Are Best Empire Shoots

Won Special Challenge Trophy in 1927 Rifle Shooting Competition. Canada won the King's special challenge trophy for 1927 in the miniature rifle shooting competition for boys of the British Empire. Canada's average for 3,000 boys who competed was 79.2 points out of a possible 100.

The King has sent a message to the secretary of the National Rifle Association under whose auspices the competition was conducted, congratulating the Canadian boys on "their first and well-deserved victory."

The King's challenge trophy is awarded for a match between the full strength of the youth of Great Britain and the British Dominions. All the competitors must be under 19 years of age, and they shoot for the trophy in their own countries. In connection with the competition, the National Rifle Association presents medals to all individuals who have made scores of outstanding merit.

Breaking Into Market

Mission District, B.C., Competing Successfully With U.S. Vegetable Growers

Some \$40,000 of forced rhubarb was raised this year in Mission District, B.C., ten cars being shipped to prairie points and the balance to the coast cities. The forced "barb" is now being followed up by rhubarb grown in the open fields.

By shipping mixed carlots, which included cauliflower, spinach, cucumber, radish and green onions with the rhubarb, the Mission growers have been able to compete with the Walla Walla growers which have hitherto controlled this market.

Next season Mission growers hope to pack all their rhubarb at one central place instead of every man having his own packing house. By this means the crop will be standardized and only "Fancy" and "No. 1" will be shipped. A new and attractive label is being prepared for next season's crop.

GREAT PRAISE FOR BABY'S OWN TABLETS

The Dr. Williams' Medicine Co. have received the following letter from Mrs. Griffiths, of 21 Merchiston Ave., East Hamilton, Ont., concerning her experience with Baby's Own Tablets:

Dear Sirs.—I wish to thank you for the handy little booklet you sent us on the Care of Children. My baby boy was six weeks old when I first used Baby's Own Tablets, and I can assure you that he is a healthy and happy baby. He is also well and happy. They are a real good sample of what Baby's Own Tablets can do, for I have never yet needed a doctor for either of them."

The booklet to which Mrs. Griffiths refers is the example of a combined producer-consumer-cooperative organization. Half of the capital stock is in the hands of 10,000 retailers, large and small, scattered throughout the British Isles, the other half is owned by the British Bacon Factories which supply the carcasses. Such an organization, bringing together as it does, a single distributing board for the users and consumers of a given commodity, leads to the Company great internal strength.

The Company in London undertakes to accept all suitable bacon as lead is put in its conversion into white lead, which is the most reliable base for nearly all paints.

Toronto is to have a corn-borer insect-spect, but what is really needed is an official to get after folks who bore books and never return them.

Among the chief uses to which lead is put is its conversion into white lead, which is the most reliable base for nearly all paints.

Strengthened For Extra Long Mileage

Gum-Dipping, the exclusive Firestone process, impregnates and insulates every fibre of every cord with rubber, building into Firestone tires longer service by strengthening the side walls to withstand the extra flexing strain.

CHAPTER XXVI.—Continued

Mrs Kalinski looked very smart in her black satin tea-gown and gold embroidery that her Isadora had brought from the store. She took her neighbour into her confidence. "No matter what I could say, mind you! The woman said she paid seventy dollars for it once, and Isay got it for fifteen. She wanted thirty, but Isay told her it was the worst thing to sell. Who was wearing tea-gowns now?—they was out of date leg o' mutton sleeves. And all the time Isay was thinking of me. I had a red cashmere one with Wattieu pleats when our Rachel was comin', and his papa says little Isaac will be served as good, even if it did cost fifteen dollars and could be sold for thirty easy. He's that good a man, and spares no expense in reason."

Mrs. Corbett brought the tea from the kitchen and filled the cups. "You and me are lucky women," she said, "to have two good men like we have. Ain't some of them the easy goin' devils, though? I don't know what to think of Helm's man, though she sticks up for him and is afraid he's been lost in a storm or drowned in a river. Poor girl—it's a shame to see her havin' to work in a Chinks, but what could the poor girl do? Not one of these dainty ladies would have her, they all had some reason."

"If she were just a Hebrew girl now," said Mrs. Kalinski, "one could go to the Hebrew Association of Women and they would find a place for her. We would not have any nice white girls of ours workin' in a Chinese shop and havin' to take lippy talk from every Harry, Tom, Dicken, and maybe worse. Mrs. Sternberg and Mrs. Swartz are grand on that, and

good girls they have found for our people."

Mrs. Corbett paused, with her saucer half way to her mouth. "Look at that now! Ain't the Jews wonderful to think of things? We've got grand societies, too, and I never once took thought of them. Sure we've got societies. They're all up to their eyes in pneumonia jackets and many-tailed bandages now, and socks for the soldiers, but they're grand women, too. When I came here first I used to take care of the Club room at the 'Y' and I used to see them there millin' round, very civil spoken women, too, and tryin' to make the world better, and God knows it needs it. I'll go to Mrs. Bell, the old lady, and I'm glad you spoke of this, Mrs. Kalinski. Maybe we can get a decent place yet for Helm, though if she takes the baby away I don't know what I'll do with Rose and Dan."

Mrs. Corbett went that evening after Helm had gone to work, leaving the baby to the watchful care of Rose, who sat in No. 18 to do her lessons.

Mrs. Bell was at home, and would speak of Helm's case at the meeting of the Lloyd George Chapter the next day.

A week later a new place was found for Helm. Mrs. Bell said it was an ideal place, and while ten dollars a month was very little, still it was not every place she could have the privilege of keeping her baby, and Mrs. Herrriott would be very kind to her. Mrs. Herrriott was young and inexperienced, and found her baby a great care. Helm could mind the two babies and Mrs. Herrriott would do the work.

Old Sam was sorry to part with Helm, and gave her a feather fan. "You come back some day—old Sam's glad. Good girl—easily tray-teachee make chop suey—come back! You come see my girl, too, and have chop suey."

Helm paid her rent at the "North Star," and had three dollars left.

The Herrriott home was a six-room bungalow on 127th Street, three blocks from the car line on 12th Street. It was a little house, low-roofed, square, with but little pitch in the roof, and high pillars in front, much too high for the height of the house, giving one the sensation as Helm thought of seeing a cow gettin' up hind legs first. Rosie and Danny conducted her to the place. Rosie carrying the baby and Danny helping Helm with the heavy valise.

"I hope you don't like her," said Rosie, "and then you'll come back. I'll let her baby cry more than ours, and just when you get little Lili asleep, her kid will wake up whinin'!" Well, anyway, Helm, you can always come back, and we'll manage some way."

Helm kissed her two good friends at the back door, but Rosie refused to go until she saw if the lady were at home.

"Maybe she's changed her mind," she said speaking from her experience with ladies—"or has got help—or sometimes has happened. You can't depend on these women in the West End. Ain't that right Dan? They don't pay their debts, either, very good. They always say 'Come back again.' Dan collected for a tailor, and he knows. They don't remember anything, less than five dollars, and when they're stuck for another excuse they peep out of one of the windows to see who it is, and won't let you in."

Mrs. Herrriott was in and had not engaged anyone else, and so the two girls had to go home alone, which they did regretfully.

Helm found the house in a state of siege. Confusion reigned everywhere. The invader slept in a baby carriage which filled the greater part of the living-room, and when he slept all noises were muffled. The grandmother, who had been conscripted into service, padded about in her bedroom slippers. The telephone bell was stuffed with paper. No one was ad-

The British custom of serving 4 o'clock tea in business offices is fast "taking on" in Canada. Many Canadian, as well as British-born, executives now order Red Rose Tea for their office staffs, because it is the same quality as the finest English teas. Sold by all grocers, in bright, clean aluminum.

mitted to the house, not even the baker.

There was a little room off the kitchen where Helm and Lili were to sleep. It had just room enough to take in the rubber-wheeled carriage. "Oh, I will be so glad to have someone to take this old baby off my hands," said Mrs. Herrriott frankly, "he spoiled last summer for me, but I don't mean to let him spoil this one. Isn't a baby awful? I hope yours is good. Anyway, I can get out now, and, believe me, I am going."

Mrs. Herrriott, having shamed off family cares, resumed her place in her little world. She curried and plied bridge, and went to the matinee with her friends and came home only when everything was over. She was a pretty, plump-faced girl of twenty-three who had the misfortune to be the only child of adoring parents. Mandie is not fond of work," her mother often said; "but never mind, she'll take it to when she has a house of her own." Young Robert Herrriott, who had married her with pomp and circumstance at the First Church believed the same thing.

Maudie had been in a terrible rage about the coming of the baby, but her mother fondly believed she would be attached to it when it came. "They make their own babies, do she said. "Maudie will be so fond of it she wouldn't take a million dollars for it when she has had it, two days!" But Maudie's friends agreed among themselves that they would hate to offer it to her.

The baby was now two months old, and the great fountain of mother love, which the baby's grandmother had hoped for was still either non-existent or untouched. "She'll take it to when it gets a little older," she would say. "You'll see, when it gets cutie Maudie will take to it."

Helm knew that cats sometimes refuse their young, but she did not know that it could be true of human beings.

In a week the seige seemed to be lifted. Long lines of washing had been fluttering on the clothes reel; closets were tidied; floors polished, the "old" baby put on a regular way of living. Mrs. Herrriott had won the Ladies' Points competition at the rink, and her friends had told her she was looking years younger.

One night, when the Herrritots were going for a drive, Mr. Herrriott wanted to take Helm, too, and her baby. "That girl hasn't been out of the house since she came," he said. "Ask her to come, Maudie."

Maudie laid a well manicured finger on a neatly carmine lip. "Hush, Elisha," she said, "don't spoil her, leave well enough alone. Come on, we'll take the Bundnis—they have no kids to want to come. Hurry, Bob!"

(To Be Continued.)

The use of Miller's Worm Powders insures healthy children so far as the aliments attributable to worms are concerned. A high percentage among children is tractable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and succumb to weakness. This preparation gives promise of health and keeps it.

May Abandon Geneva

Rumors Are Revived That League May Move To Another Capital

Rumors that the League of Nations may be transferred to some other European capital were renewed recently at Geneva when it was learned that the league had not succeeded in acquiring a site deemed necessary for the proposed league palace.

It appears that the English woman who is proprietor of the villa where league delegates have been housed for years is adamant in her refusal to sell the property. This has given a new impetus to those advocating taking the league out of Geneva and installing it in Vienna or elsewhere.

Canada Comes Second

According to word from New Zealand, that country claims a world leadership in per capita possession of dairy cows with 93.1 per hundred of population. Canada, according to the table, ranks second with 40.4 per hundred, followed by the Irish Free State with 40.0 per hundred. Australia has 39.9 cows per hundred of population.

Human nature's funny. No sooner does a man "get on his feet" financially than he wants to get off them physically.

A reliable antiseptic—Minard's.

Cancel Grants To Class "B" Fairs

As Federal Aid Withdrawn, Support Should Come From Provinces

Some discussion took place in the House at Ottawa, and criticism offered over the cancellation of federal grants, under the department, to class "B" fairs. Hon. W. R. Motherwell, minister of agriculture, explained that grants had been made to class "B" fairs during the war as a war measure. This aid had been discontinued, as they were not entitled to federal aid. They should get aid from the provinces. During the past few years, Mr. Motherwell said, he had noticed several provincial governments had increased their grants to class "B" fairs in anticipation of cancellation of aid by the federal government.

"Class "A" fairs were receiving federal aid, and while only \$50,000 was granted as federal aid before the war, the amount now totalled \$285,000 annually.

A large number of the members took part in the discussion, several of them expressing their opinion that the smaller fairs did as much, if not more, for agriculture generally than the big ones.

Alfred Speakman (U.F.A., Red Deer) believed in the encouragement of educational fairs, with good livestock and agricultural exhibits, in place of those fairs specializing in side shows.

Mr. McLean (Liberal, Melfort) spoke in favor of aid to the smaller fairs in the agricultural districts.

Another Reform In China

Ruler Of Human Province Forbids Binding Of Women's Feet

Women of Human are to totter no longer on tiny bound feet. Marshal Feng Yuhsiang, the revolutionary ruler of the province, has not only prohibited binding the feet of young girls, but also has ordered that the feet of their mothers and grandmothers, must be loosed from their bonds.

This abolition of "lily feet," which Chinese for generations have considered among woman's greatest charms, but which appear as cruel deformities to most orientals, is to be accomplished by persuasion if possible, but by direct official action if necessary. A propaganda against footbinding is being carried out in women's meetings, in newspapers and wall posters.

To enforce his edict Marshal Feng has established a "Bureau for the Liberation of the Feet of the Women," whose agents make house to house round trips to find bound feet are found to be purloined. Agents are promised a bounty visits. Heads of households in which of \$2.50 for every 100 sets of discarded foot wrappings they turn in, and one month of the campaign brought in more than 25,000 sets.

For Frost Bites and Chilblains. Chilblains come from undue exposure to cold and can affect any part of the body. Another important preparation of either an excellent ointment is Dr. Thomas' Eclectric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is prompt and its application extremely simple.

Late Threshing In Alberta

Estimates That Nearly Thirty Million Bushels Of Grain threshed

In Spring

Alberta's farmers, whose wheat was left in the field unthreshed all winter did not fare badly. In most cases they made money through the fact that they could not sell their grain until this spring, since wheat, for example, increased in price from 20 to 23 cents a bushel. A local grain man estimated that nearly 30,000,000 bushels of grain were threshed in Alberta during the last part of the winter and this spring.

Alberta Telephones

An increase of 154 exchange stations and 93 rural stations, or a total of 247 new stations in operation during the month of April, 1928, is reported by the Alberta Department of Telephones.

Two French engineers have invented an aerial torpedo for transporting letters and packages at a speed of nearly 300 miles an hour.

Little Helps For This Week

"He that hath a pure heart shall receive the blessing from the Lord."

Psalm xxiv, 4, 5.

O God! the pure alone,
E'en in their deep confessing,
Cast Thyself down,
And find the perfect blessing;

Yet to each waiting soul,
Speak in Thy still, small voice,
Till broken love's made whole,
And saddened hearts rejoice.

How does Jesus make men pure? He made Himself one with our human nature that He might heal and bless us through His contact with His divine nature.

A great deal—especially if treatment is commenced while the child is still young.

Each case, of course, presents its own problems with their special solutions. Now, in the main, your dentist, the orthodontist, and the dental hygienist, the branch of dentistry, will correct this condition by making use of metal bands and bars which your child would need to wear continuously for some time during the period of wearing, determining by the severity of the case in hand.

But you can wonder, perhaps, how a tooth can be moved when fully erupted, increased as it is in dense and seemingly immovable bone?

However, it is simply a matter of making use of a natural physiological process whereby bone tissue is resorbed and broken down in advance to a proper grip applied and twisted for the time until the tooth to move bodily through its supporting bone structure.

Then is tooth straightening a painful process?

Not in the least, where too rapid movement is not attempted. And when should it be com-

monly done? Like to take the child in hand while the child still has this temporary set, and generally at about the eighth year, when success is more easily and quickly secured.

Then, of course, where treatment is to be continued, there is a considerably more difficult of correction because the muscles and tissues are becoming more or less fixed. When early adult life is reached, "tooth straightening" is not advisable except in the very simple cases.

Alberta Telephones

Minard's Liniment for insect bites.

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude remedies. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the years since its invention it has remained standard with physicians.

You will find nothing else quite as quick in its effect, so harmless,

so efficient.

Indigestion

One tasteless spoonful in water neutralizes many times its weight in acid. The results are immediate and no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go to school—now why this method is successful.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by your physician. For 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

A reliable antiseptic—Minard's.

Main Street

The Ladies Aid met at the home of

Mrs. Jas. Fenton Thursday afternoon.

Tom Askin left Thursday night to

spend the weekend in Edmonton.

Mrs. Thorn intends visiting with

friends in Edmonton next week.

Mr. and Mrs. L. A. Schon intend

leaving Saturday for a two weeks

trip through central Alberta.

Mrs. T. H. Fleming left Friday for

Calgary where she intends making

her future home.

Mrs. H. W. Love and Miss Grace

Love left Thursday for a trip to Vancouver and other Coast points.

Miss C. Cairns of the local Bank

staff, is leaving Saturday to spend

her annual vacation at Edmonton.

Mr. Reed's has been enjoying a visit

from a cousin of his from Saskatchewan.

Mr. and Mrs. Murray Hamilton re-

turned to Edmonton Wednesday af-

ter attending the wedding of Mr.

Erle Prior and Miss Elizabeth Ham-

ilton. Canadian Club and of Boston Musi-

cal societies attended the recital.

Ontario—A shipment of six bacon

type pure-bred swine from Canadian

farms to New Zealand has recently

been made. Three of the hogs were

brought from Redgpton, Ontario, and were

winners at the Royal Fair.

The other three were Tamworths from

Ontario and Quebec breeders. This

is the first time that live

hogs have been imported into New Zealand from

North America since 1916. Other

shipments are expected to follow

shortly.

The annual dog-racing classic—the

Eastern International Dog-Sled Derby—will again be run in Quebec City, February 20-22 next under the

auspices of the Quebec Sports Association of that city.

The race covers 120 miles in the three days and al-

ready some of the best known mush-

ers in the United States and Cana-

ada are entered for the race which

carries a cash prize of \$1,000 and

a trophy for a year of a handsome

gold cup.

Calgary—More than \$500,000

worth of cattle from the provinces

of the province of Alberta were ex-

ported to the United States between

July 1st and November 30, 1927, ac-

cording to the report of the Comme-

rcial Commission at Calgary. The ship-

ments include 12,000 cattle, comprising stockers, feeders and

butcher cattle. The American mar-

kets at the present time are very

inviting and stockmen in Western

Canada and the United States have

shown greater activity during the past six

months than in any similar period

since 1922.

Canadian Pacific Express, railway

and steamships and finally an air-

plane were employed to carry two boxes

of roses from Brampton, Ont., to

Paris, France as a gift at Christ-

mas.

B. MacLean of Toronto, Mr. Pauline

de Faugnac-Lucinge and to Countess

Odile de Lubersac and only

the heavy snowfall that swept Great

Britain at that time prevented their

from being able to leave for Paris last

breakfast tables on Christmas morning.

As it was, they arrived two

days later, as fresh as though they

had just been plucked.

Lieutenant Wright, of the Edmonton

Branch, Salvation Army was in Irma

Thursday in the interest of the hospital

work being done by the Salvation Army.

Mr. J. J. Lehman, of Mericopa, Cal-

ifornia, has been visiting his sister

Mrs. V. Nash, North West of Irma.

After leaving here Mr. Lehman inten-

dents visiting in New York, before go-

ing home.

It is expected that a large num-

ber of Orangemen from the Saskatch-

ewan border to Tofield will be present.

The ladies are doing their utmost to

maintain their reputation among the

visitors of being good caterers.

Mr. Isaac Reeds was offered the

principalship of the Viking High

School but we understand that he has

been prevailed upon by members of

the High School Board and others to

remain for another year at Irma.

Mr. and Mrs. W. H. Morse and fam-

ily have arrived from Laingsburg,

Michigan and intend making their fu-

ture home on the C. Creamer farm in

Section 10-46-8-4, which Mr. Morse

has purchased.

Mr. and Mrs. Charles Peterson ar-

rived Monday night to spend a few

weeks with Mr. Peterson's parents

and brothers in the Irma district.

Charlie has been living at Kingsbury,

California and motored to Irma in six

days. They intend motoring home

through the eastern states after they

have finished visiting their friends

and relatives in the Irma district.

Within the next twenty-five years

Canada will have reached a degree of

prosperity beyond the bounds of reali-

zation at the present time. We are

only beginning to raise the curtain

upon the vast mineral resources which

lie beneath the great pre-Cambrian

shield of the earth, and fully 95 per

cent of these resources lie wholly

within Canada. The pre-Cambrian

layer of the earth's crust is the greatest

mineral bearing strata known to

exist in the entire world."—Hon.

Charles McRae, Minister of Mines, On-

tario.

North America since 1916. Other

shipments are expected to follow

shortly.

Morris Ackerman, acknowledged

as one of the leading attorneys in

this country, urges protection and a close

season for great northern pike, grey

trout and dace in Ontario and reduc-

tion of number allowed to be

caught in a day below the figure of

one spintop, now permitted.

Otherwise depletion will cause heavy

loss in diminished tourist traffic.

French-Canadian folk songs are

becoming more and more popular as

was shown by the recent recital at

the Jacob Sheep Hall, Boston, ad-

dressed by J. Murray Gibson and

the singing group of Chantal Mor-

chand, well-known singer of French-

Canadian songs. Boston University

students and many members of the

Canadian Club and of Boston Musi-

cal societies attended the recital.
